

Paper & Plastic Banding Machines

TZ Series

Ideal for banding several items together

Do you need to bundle several items together such as postcards, brochures, small boxes and other materials? Consider using one of our high quality banding machines. These machines can be used with white paper rolls, brown paper rolls or plastic rolls. Simply insert your stack, activate the machine and let the banding machine do the rest. Most of our banding machines can be activated via a button, a foot pedal or via a photo sensor. The PP-888 models use 500 foot tape rolls and the PP-889 models use 2,000 foot tape rolls. The high-capacity "A" model machines use a closed arch to feed the material.

The TZ Series machines use white or brown paper tape with a heat seal adhesive to ensure a tight seal without leaving a stain or residue on the bundled product. Several times faster than hand banding (up to 25 cycles per minute), the unit requires very little table space, is simple to thread and operate, and is economical to use.

Each machine is calibrated for a single width of tape, and features a patented mechanism for smooth tape feeding and taping. Available calibrated for 20 mm, 30 mm or 40 mm.

Features

- Easy to start up, operate, and maintain
- Lightweight, compact design
- Automatic or manual activation
- Runs clear plastic, brown or white paper
- Available in 20mm, 30mm or 40mm band width
- Up to 25 bands per minute
- 1 Year Limited Warranty

Medium Duty Banding Machines

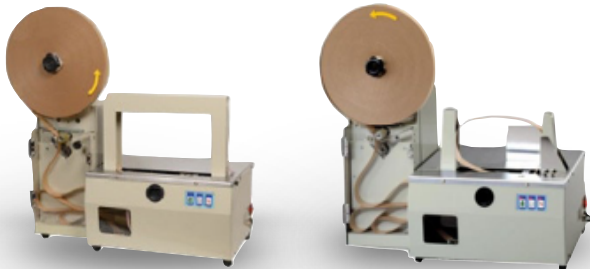

If you are packaging bundles of paper, small boxes, brochures, fliers, booklets and other material together, you may want to consider using a paper banding machine like the TZ-888 or the TZ-888A. Both of these models are very similar in operation, using a 500 foot tape roll to quickly organize and bundle material. This can be used with white paper rolls, brown paper rolls or clear plastic rolls. The TZ-888A is very similar to the TZ-888, but has a slightly larger packaging width and height. These machines can package between 20 to 25 bundles per minute and operate using a standard 110 volt wall outlet. These paper banding machines easily sit on just about any desk or table and are extremely easy to set up and use. Simply place your product under the paper arch. You can then activate the machine by pressing a button, pushing a foot pedal or switch it to automatic mode, enabling it to automatically cycle via a photo sensor.

Models:	TZ-888	TZ-888A
Machine Dimensions	16 3/4"L x 111.8"W x 16"H	
Package Dimensions	1.5"- 9.5"W / .25"- 5.5"H	1.5"- 10.6"W / .25"- 6.7"H
Tape Accepted	500 ft rolls of paper or plastic	
Power	110V	
Speed	20-25 pieces per minute	
Shipping Weight	60 lbs.	

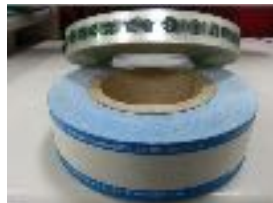

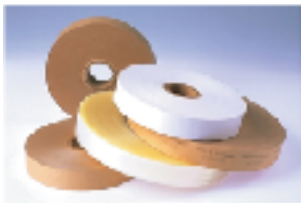

High Capacity Banding Machines

If you need a little extra capacity in your paper banding operations, you may want to consider using the TZ-889 or TZ-889A. These paper banding machines use large banding tape rolls (paper or plastic) to quickly bundle material together. Both of these machines can be used with 500 or 2,000 foot tape rolls, which sit to the side of the machine. The TZ-889A is the same as the standard TZ-889, but features a slightly larger packaging capacity. These machines are extremely easy to use and can bundle stacks of brochures, boxes, booklets, pamphlets and much more. Simply insert the material you need to band together and then press a button, press a foot pedal or let the photo sensor automatically cycle the machine. These paper banding machines are perfect for daily use and take up little space.

Models:	TZ-889	TZ-889A
Machine Dimensions	28"L x 11.8"W x 28"H	
Package Dimensions	1.5"-9.5"W / .25"- 5.5"H	1.5"-10.6"W / .25"-6.7"H
Tape Accepted	2000 ft rolls of paper or plastic	
Power	110V	
Speed	20-25 pieces per minute	
Shipping Weight	83 lbs.	

Banding Tape

Width	Basic Weight	Color	Roll Length	Rolls/Carton
20mm (25/32")	40 lbs.	White, Brown or Clear Plastic	500 ft	60
